

HALOCOMPLEX – CONTROLLED DRY AEROSOL SALT THERAPY SYSTEM

The **Halocomplex** system brings the microclimate of the natural salt mine to the surface, practically to "your door", creating the most important parameters, the determined concentration of dry aerosol and surplus of negative ions in the air.

The essential of the application is the inhalation of 0,2-5 micron size's (negatively filled) salt particles.

The inhalation of dry rock-salt aerosol, even if in small quantity /1-3 mg/, strengthens the defend mechanism of the airways; disinfects, strengthens the immun system, helps to relax and has an antidepressive effect.

Considering the fact, that every fourth european citizen has some sort of **allergy**, the importance of effectual prevention and the medicative treatment becomes more and more essential.

The suggested controlled dry aerosol salt therapy of our company is offering a reliable solution.

/The common therapies in Hungary are unregulated-, low in concentration-, using wet or dry salt aerosol, with uncontrolled air humidity, -temperature, and -wind speed in the salt room./

All those problems (assurance of controlled salted space in salt room) **are resolved by the know-how of the air technology and the special salt generator, developed for our dry aerosol salt therapy system, possessing Medical-, Quality- and Electrical standard's Certificates of the European Union.**

The personal ionization equipment, that guarantees the negative ion surplus in the air near the user, is going to receive the EU certification in 2007, and will ensure and multiply the medical-, relaxation- and wellness effect of the treatment.

The **Halocomplex** system presenting by our company, offers:

- **cleaning the lung as a "toothbrush" from the dirt of the air and strengthening the general biological- and immun system of the airways and the whole body, and regenerating and rejuvenating the skin and hair;**
/The human lung with it's surface of 75 m² is our biggest organ having direct contact with the external environment and needs regular cleaning just like our skin and teeth./
- **prevention and successful treatment of all existing airway- (hayfever, allergic sinusitis) and other (pollinosis etc..) allergys;**
- **efficient treatment of all existing chronical airway illnesses (asthma, pneumonia, bronchitis, chronical cold, etc..), ENT diseases (rhinitis, laryngitis, sinusitis, pharyngitis, etc..), infection of sinus, viral infections, chemical sensibility, skin problems, (acne, neurodermatitis, psoriasis, cellulite etc..);**
- **succesful treatment of heart- and vascular problems (especially in combination with lung diseases), vegetative nervous system disorders, depressions and psychoemotional diseases;**
- **treatment of problems in connection with obesity caused by disturbed metabolism ;**
- **help in giving up smoking and cleaning the smoker's lung from the pollutants of cigaret smoke.**

We offer the installation and operation of **Halocomplexes** of following types:

Big salt rooms – for large hotels, spas, health resorts, hospitals, clinics, medical rehabilitation centers, large wellness and spa hotels;

Medium halocomplexes – for smaller wellness- and spa hotels, centers of natural therapy, private clinics, preschool institutions, pansions;

Small halocomplexes – for private houses, cosmetical saloons, solariums, outpatient's departments, smaller pansions.

Converting of already working non controlled and non dry salt therapies, into controlled, dry salt aerosol therapy.

The site of the saltroom can be completed by cloak-room, operator's room and room for medical examination.

Our company is ready to deliver the following additional, wellness- and various medical systems according to request:

- **Aromatherapy** /for relax and therapy/;
- **Personal negativ iontherapy** /providing the natural negative ion surplus of the air, that is not existing in buildings and other closed premises/;
- **Audiotherapy** /stimulates with the aid of so called „coded music” the excretion of brain hormones/;
- **Detensortherapy** /stretching the spine, and filling the intercalated disks with fluid/;
(see www.detensor.de)
- **Massage** /special swivel wheel-armchair which is adapted for treatment of cellulitis and to resolve stress/;
- **BPRS treatments** /special biophysical, magnetopunctural (biomagnetic and elektroimpulse) medical instrumentation for regeneration/; (see www.bprs.eu)
/Strengthens the immun system, relieves pain, enhances the self preservation and self curing of the organism by filling the body with magnetic energy through the acupuncture's meridians.)
(The BPRS instrument can be bought after a short cours of treatment and lifestyle.)

The required space for different services offered by us are the following:

Saltroom:	2-3,5 m ² /capita and 6 m ³ /capita;
Cloak-room:	1-2m ² /capita;
Operator's room:	2-6m ² ;
Medical room:	6-8 m ² ;
Reception and waiting room:	as desired;
Aroma room:	2-3,5 m ² /capita and 6 m ³ /capita;
BPRS treatments:	2-3,5m ² /capita;

The personal negativ iontherapy, the detensortherapy, the massage, the audiotherapy does not need separate rooms; those can be held in the aroma room.

In order to give you an offer, we need the following data:

- **constructional and engineering data of the object;**
- **design preferences /standard-, chosen by our client's references or by special request of buyer/.**
